What is Kleppinger Design Group, Inc.?

Kleppinger Design Group is a kitchen design company started by Bill Kleppinger in 2003. With its staff of designers and customer service, KDG has over 200 years of combined experience in the kitchen design and building industry.

What are the advantages of using Kleppinger Design?

With over 200 years worth of experience and team approach, there isn't much that KDG has not seen or designed. Our talented designers not only have a good eye for style and design, they are all friendly and fun to work with, and look forward to helping you complete your project in a timely manor and within budget.

How can I find out how much my project will cost?

Every project varies, depending on size of room, work to be done, etc. The best way to get a realistic price is to visit our showroom and meet with one of our designers. After reviewing your space (which may require a site visit) and cabinet selections, we can provide you with a realistic budget price.

What cabinet lines do you carry?

We carry 5 different cabinet lines. Mid Continent, Shiloh, Crystal, Dutch Made, and Ronbow.

Mid Continent is our production line. With limited door style and finish selections, their lead time is around 3-4 weeks.

Shiloh is a semi-custom line. They have a broader door style and finish selection than Mid Continent, and offer glazed and brushed finishes at no extra charge. Shiloh's lead time is around 4-6 weeks.

Crystal has both a custom and semi-custom line. Everything with Crystal starts with standard sizes, but they can build just about anything. If you can't find a standard door or finish that you like, they can make something custom just for you. Aside from their framed line, they have a frameless line that fits any contemporary needs.

Dutch Made is a full custom cabinet maker. Based in Grabil, Indiana, the art of cabinet making has been passed on from generation to generation. With Dutch Made, if we can draw it, they can build it. What separates them from the others is their finishes. If you want your kitchen to look like it was built 150 years ago, these are the people to do it. Their lead times vary, but right now they take about 8 weeks.

What does a kitchen remodel cost? FAQs from Kleppinger Design

Ronbow offers pre-made vanities. Pick your vanity style and size, and choice of stain. They also provide vanity tops and sinks to compliment their cabinets.

Do you provide anything other than cabinets?

Cabinetry is our primary business, but yes we do. We can also provide hardware, cabinet accessories and inserts, countertops, sinks and faucets, and closet solutions.

Is there a place where I can view the products?

Yes. The best place to see all of these products is our 7000 square foot showroom in Fairfax, VA. With over 30 displays, we show our cabinetry lines in a wide variety of woods and finishes. We also have a large sample room to view countless combinations of door style and finish options. While it is impossible to show every combination, we have quite a collection of samples showing the more popular combinations. Along with our cabinet door samples, we have a large collection of countertops, hardware, molding, tile and flooring sample to help you make your selections.

Do you work on spaces other than kitchens?

Absolutely. We can address your storage and design needs for just about any space in your house. Aside from the kitchens we have in our showroom, we also show vanities, a mud room, garden room, laundry room, wet and dry bars, closets, pantries, and desks. In fact, all of our workstations are cabinets provided by Crystal.

Who do you work with?

Although most of our work is with builders, contractors, architects and interior designers, we do work directly with you the home owner as well. If you already have a contractor, we will work with them, and if you need someone to do the work, we can provide you with a list of people to contact that we have worked with in the past.

What is the Process?

The best place to start is in our showroom. This is where your designer can show you around, explain the differences in the different cabinetry manufacturers, and let you see first hand what is available. Your designer will also schedule a time to come out to your house to take measurements and get a feel for the space. Drawings will be produced from this meeting and a price range will be established. While everyone is different, you'll probably meet with your designer a few more times to either fine tune the design or budget, or both. Once all of your selections are made, and the design is finalized, we will place the order.

How long will it take to get my cabinets?

Lead times will vary based on cabinet manufacturer and finish selection. Within a week or so of placing the order, we will have a tentative ship date from the manufacturer. We will pass that along to you as soon as we know. Lead times range from 2 to 8 weeks.

Do you deliver the cabinets?

Yes. We handle storage and delivery of your cabinets. Once the cabinets arrive at the warehouse, our operations manager will contact with you to coordinate delivery to your house. If you are not ready to take delivery we will store the cabinets until you are ready. Cabinets stored for more than 4 weeks may incur storage fees. Once a delivery time is established, the delivery truck will arrive and the driver and his helper will carry the cabinets into the house.

How do I set up an appointment with a designer?

What does a kitchen remodel cost? FAQs from Kleppinger Design
how do i set up an appointment with a designer?

Call us at 703.208.2208 or [email info@kleppingerdesign.com](mailto:info@kleppingerdesign.com) If you have a specific designer that you wish to work with please let us know.

Do I need an appointment?

No. If you just want to take a look at the showroom please feel free to stop on by. The reason we recommend setting up an appointment is so we can make sure someone can spend as much time as needed to answer all of your questions.
